INFORMATION FOR AUTHORS

The Royal Society of Chemistry welcomes submission of manuscripts intended for publication in two forms, Research papers and Faraday Communications. These should describe original work of high quality in the areas of physical chemistry, biophysical chemistry and chemical physics.

Research Papers

Full papers contain original scientific work which has not been published previously. However, work which has appeared in print in a short form such as a Faraday Communication is normally acceptable. Four copies including a top copy with figures etc. should be sent to The Editor, *Faraday Transactions*, at the Editorial Office in Cambridge. Authors may, if they wish, suggest the names (with addresses) of up to three possible referees.

Faraday Communications

Faraday Communications contain novel scientific work whose interest to the readership and impact on the subject warrants rapid publication. The total length is restricted to four pages of the double-column A4 format. Submission of a Faraday Communication should be made to The Editor, *Faraday Transactions*, at the Editorial Office in Cambridge.

Faraday Research Articles

Faraday Research Articles are occasional invited articles which are published following review. They are designed to be topical articles of interest to a wide range of research scientists in the areas of physical chemistry, biophysical chemistry and chemical physics.

All authors submitting work for publication are required to sign an exclusive copyright licence. All submissions should be accompanied by a completed form (a blank for photocopying is reproduced at the end of the Information for Authors in Issue 1), without which publication cannot proceed.

Full details of the form of manuscripts for Articles and Faraday Communications, conditions for acceptance etc. are given in issue number one of *Faraday Transactions*, published in January of each year, or may be obtained from the Editorial Office. Instructions for authors can also be accessed on the World Wide Web at the URL <http://chemistry.rsc.org/rsc/fapifa.htm>.

There is no page charge for papers published in *Faraday Transactions*. Fifty reprints are supplied free of charge.
