

New Groups within the Society for Mass Spectrometry and X-ray Fluorescence?

FEW replies have been received in response to the notice in November's *Proceedings* inviting readers to notify their interest in the formation of Groups dealing with these subjects. It is possible that some members who have an interest have not yet written, and that some interested non-members may not have seen the notice.

If you are interested in the formation of either of these Groups and have not yet written, please do so to Mr. D. W. Wilson at the SAC Offices at 9/10 Savile Row, London, W.1. If you know of any non-members who might be interested please bring this notice to their attention.
