Erratum: Preliminary investigation of elongational flow of dilute polymer solutions [J. Appl. Phys. 47, 4255 (1976)]

S. T. J. Peng and R.F. Landel

Jet Propulsion Laboratory, California Institute of Technology, Pasadena, California 91103

PACS numbers: 46.30.Jv, 47.90. + a, 99.10. + g

The concentrations given in our previous paper under the above title have been found to be in error. They are all too low by a factor of 1.86. Since the concentration scale reduction was a relative one, to that of the most dilute solution,

Fig. 8 remains unchanged. Hence the observation that the data superpose with merely a horizontal translation of the time scale, with no vertical shift, is also unaffected.

ANNOUNCEMENTS

Combined annual meetings of the Electron Microscopy Society of America and the Microbeam Analysis Society, San Antonio, 13–17 August 1979

PACS numbers: 01.10.Fv, 07.80. + x

The combined 37th annual meeting of the Electron Microscopy Society of America and 14th annual meeting of the Microbeam Analysis Society will be held at the Convention Center in San Antonio, Tex., 13–17 August 1979. Research workers in the physical sciences will be particularly interested in the Workshop on Analytical Electron Microscopy, and the Annual Symposia on scanning electron microscopy—imaging with backscattered electrons, very-high-resolution imaging, Monte Carlo calculations for SEM and electron

microprobe, unconventional imaging, surface analysis, and laser Raman microanalysis. Further information regarding preregistration and hotel reservations for this meeting can be obtained by writing to either Dr. Robert Dobrott (MAS Local Arrangements Chairman), Texas Instruments, P.O. Box 225936, Dallas, Tex. 75265, or Dr. William McCombs (EMSA Local Arrangements Chairman), Department of Microbiology, Scott and White Clinic, Temple, Tex. 76501.
