

RSC Nanoscience & Nanotechnology

Covering the wide-ranging areas of nanoscience and nanotechnology, this series provides a comprehensive source of information on research associated with nanostructured materials and miniaturised lab on a chip technologies. Fully referenced to primary literature each title is an accessible reference for professionals and researchers in academia and industry.

Recently Published

Atom Resolved Surface Reactions: Nanocatalysis

Authors: P R Davies and M W Roberts

This book offers a unique perspective of the impact of scanning probe microscopies on our understanding of the chemistry of the surface at the nanoscale. Topics discussed include:

- The dynamics of oxygen chemisorption at metal surfaces
- Control of oxygen states and surface reconstruction
- Dissociative chemisorption of diatomic and hydrocarbon molecules
- Nanoparticles and chemical reactivity
- STM at high pressures
- Structural studies of sulfur containing molecules and molecular templating

Ideal for those who wish to become familiar with the contribution Scanning Tunnelling Microscopy has made to the understanding of the field of surface chemistry and heterogeneous catalysis and also to those who are new to catalysis, a fascinating and important area of chemistry!

Metallomics

Integrated biometal science

This timely new journal will cover the research fields related to metals in biological, environmental and clinical systems and is expected to be the core publication for the emerging metallomics community. The journal will be supported by an international Editorial Board, chaired by Professor Joseph A. Caruso of the University of Cincinnati/Agilent Technologies Metallomics Center of the Americas.

Metallomics will publish six issues in the first year, increasing to 12 issues in 2010. The journal will contain a full mix of research articles including Communications, Reviews, Full papers, and Editorials. From launch, the latest issue will be freely available online to all readers. Free institutional access to previous issues throughout 2009 and 2010 will be available following a simple registration process.

Contact the editor, Niamh O'Connor, at metallomics@rsc.org for further information or visit the website.
